RECYCLING TWIST

The manufacturer **recycles more than 99 percent of the waste products** generated in the making of **biodegradable cleaning products** from Twist.

A key ingredient, cellulose, comes from renewable tree farms. And if you're so inclined, the packaging can be converted into a bird feeder. Products include the Euro Cloth, a combination of paper towel and sponge that Twist claims will do the work of 17 rolls of paper towels; loofahs for kitchen scrubbing; and sponges in several sizes. Suggested retail: \$1.99-\$4.99, available at Wild Oats, 1548 N Dale Mabry in Tampa. Learn more at twistclean.com.
